

## Project: Onyx Products Manufacturing Unit

Onyx is the unique product of Pakistan. The Business is about establishment of manufacturing of Marble and Onyx handicraft product. These products are made by artisans with the use of small tools and very limited machinery. Following pictures shows the manufacturing process and some products that are made. Most of the products are made from Marble/onyx waste produced at factories or quarries.

### Marketability:

Huge demand of onyx handicraft of Pakistan exists in international market like, China, Australia, and USA. The product has limited local retail market due high prices of the products. However trading houses and exporters of these products require these products in large volumes which may be targeted initially for sale of products that could be made in the units.

Gradually entrepreneurs may also enter into international market for direct exports.

### Proposed Location:

Karachi is the biggest market of onyx handicraft; huge raw material is available in Karachi.

### Potential investors:

Anyone has general understanding of stone may start this business. People already engaged in marble business may also extend their business with addition of new product line of handicraft.

PASDEC will provide trainings and guidance in establishment of this business to entrepreneurs.

Following is brief of project cost and profits.

Loan Amount Rs.	18,85,537
Applicant Share Rs.	198,393
Annual Profit Rs( 1st Year)	1,340,150
Annual Profit Rs( 2nd Year)	1,714,757
